The Millennium Challenge Compact, implemented in the Republic of Moldova in the period of 2010-2015, aims to contribute to increasing the incomes of Moldovan citizens through the development of road infrastructure, rehabilitation of the irrigation systems and transition to high value agriculture.

To develop the road infrastructure in the Republic of Moldova the Compact is investing in the rehabilitation of the Sarateni – Drochia junction segment (towards Soroca rayon) of the M2 national road.

The rehabilitation of the Sarateni-Soroca road will help increase the incomes of the population by reducing the costs of transportation, goods and services; reduce the losses to the national economy caused by the bad condition of roads and the number of road accidents through improved road conditions.

The rehabilitation works include:
- rehabilitation and enhancement of the road system,
- replacement or modernization of the associated structures, such as bridges and culverts, drainage systems,
- improvement of road safety.

**EXPECTED RESULTS**
- 93 km of rehabilitated and modernized road
- at least 300,000 beneficiaries
- about 2,000 road signs
- sidewalks and lighting along the road in 13 localities
- about 13 km of steel guardrail on various parts of the rehabilitated road
